Release Notes - WebOLO - Version 1.4.2

support@ec2software.com

New Feature

- **[WEBOLO-1690]** - Enabled order edits for BioRx
- **[WEBOLO-1878]** - Product name will now be visible while showing the booked event list for PharmOLO, especially when the schedule has multiple products. Now, while preparing the order if there is "No Availability message displayed" then it will include the next available date and the calendar link. View Booked Events will now say View Booked Orders when clicking on an event on the Availability Calendar. Renamed the Product Availability Menu Option from "Preview" to "PharmOLO"

Bug Fixes

- **[WEBOLO-1531]** - Fixed issue of no error message showing when ordering same clinical and commercial product together.
- **[WEBOLO-1755]** - Fixed issue of Referring Doctor field not mandatory when placing an order for a Clinical Trial Product
- **[WEBOLO-1881]** - Fixed site filter when exporting orders as a file.
- **[WEBOLO-1895]** - To Date will now be disabled after selecting another Edit Option on an Executed Availability Schedule
- **[WEBOLO-1906]** - Deleted sites are no longer displayed
