Release Notes - WebOLO - Version 1.5.5

support@ec2software.com

New Feature

- **[WEBOLO-2061]** - A product will automatically get selected if an event has only one product while placing an order from the calendar. If multiple products, you'll be prompted to pick a product and proceed as usual
- **[WEBOLO-2062]** - Added 8 new options when editing an executed availability schedule: 1) Extend From Date: If the schedule's from date comes at least two days from today, the from date can now be moved forward, which will extend the schedule's dates. 2) Reduce From Date: Move the from date back, so that the total days will be reduced 3) Reduce To Date: Move the to date back, so that the total days will be reduced 4) Remove Days of Week: Uncheck a day of the week to remove all of that weekday from the schedule 5) Remove Time Slots: If there are at least two time slots, removing one of them is now possible 6) Reduce Slot Times: Decrease the overall allotted time (that is, increase the from time or decrease the to time) 7) Decrease Slot Quantity: Remove allotted doses for the schedule 8) Decrease Slot Activity: Remove allotted activity for the schedule
- **[WEBOLO-2392]** - Introduced new Notification setting for Order Arrival, Order Edit and Order Cancel.
- **[WEBOLO-2649]** - Allow pharmacies that only use PharmOLO to accept order edits from WebOLO. Allow hospitals to edit orders for PharmOLO-only pharmacies.
- **[WEBOLO-2702]** - Patient Id, Study Name, and Study Id will now be displayed in Email Notifications.
- **[WEBOLO-2766]** - Lisbon JWT Token adding 'Issued At' time with 3 minutes older to avoid the server time differences.

Bug Fixes

- **[WEBOLO-2717]** - Corrected the text displayed when deactivating an availability calendar event to reflect if there are booked orders or not.
- **[WEBOLO-2720]** - Fixed issue of schedule not showing events with correct amount while using Mbq as Activity Unit
- **[WEBOLO-2763]** - Availability Schedules now save their activity correctly when using becquerel units (MBq)
- **[WEBOLO-2800]** - Fixed issue of hospital order using the new PharmOLO availability, when pharmacy only has saved schedule

- **[WEBOLO-2814]** - Fixed issue of Selected Month in Calendar Updated Incorrectly when it is in different format than mm/dd/yyyy

2024-02-15

2023-11-29

Release Notes - WebOLO - Version 1.5.0

support@ec2software.com

New Feature

- **[WEBOLO-1897]** - Introduced a new Dashboard to display the items that matters the most.
- **[WEBOLO-1898]** - Introduced a new Navigation Bar.
- **[WEBOLO-1904]** - Added option to view allowed product/procedure in pharmacy setup
- **[WEBOLO-2049]** - Correct text for cancel requested and cancelled
- **[WEBOLO-2056]** - Page header in User Management in pharmacy will now say PharmOLO users instead of WebOLO users
- **[WEBOLO-2058]** - Added tooltip previews when hovering over an Availability Calendar event for more than .5 seconds. Events that occur at the same time in the Availability Calendar week and day views no longer overlap. Added an icon & line showing the current time relative to Availability Calendar events on week and day views. Product Rcodes that do not have an assigned Rname will default to displaying their Rcode rather than blank text on all parts of the Availability Calendar.
- **[WEBOLO-2183]** - Added option to export Ordering Physician Name/Id and Referring Physician Name/Id
- **[WEBOLO-2187]** - Introduced a feature demonstration video for new versions when a user logs in.
- **[WEBOLO-2248]** - Fixed all DB access to work with 6 digits character

Improvements

- **[WEBOLO-2040]** - Correct a spelling error on the availability calendar.
- **[WEBOLO-2042]** - Modernized Activation Last Step and User Setup pages.
- **[WEBOLO-2044]** - Corrected a typo from "Exepected" to "Expected" on the Dashboard.
- **[WEBOLO-2063]** - Matched dashboard headings to be consistent with other headers within WebOLO

Bug Fixes

- **[WEBOLO-1549]** - Added option to change date while placing order
- **[WEBOLO-1907]** - Fixed issue of Adding Days to Previously Created Schedule Leads to Error Message

- **[WEBOLO-1908]** - Defaulted to expected date on the view order screen. Also added "Next Three Days, Last Three Days, Next Seven Days, Last Seven Days" options for the date range where the default is Next Seven Days.
- **[WEBOLO-1909]** - Fixed issue of Activity Dropdown Showing Multiple Values for BioRx Commercial Products.
- **[WEBOLO-2041]** - Corrected a spelling issue that prevented the calendar from loading.
- **[WEBOLO-2045]** - Users can now search over different date ranges/pharmacies/sites while one or more status filters are selected. The new results will be filtered based on the selected filters at load.
- **[WEBOLO-2053]** - Strictly Clinical Trial Exams are no longer displayed under Nuclear Medicine Exams
- **[WEBOLO-2066]** - The status on the order details screen for NMIS orders will now be shown in descending order
- **[WEBOLO-2067]** - Pharmacies are no longer duplicated in case of multiple groups. All group information is shown under "Group: Contract End Date [Status]" column.
- **[WEBOLO-2185]** - After a new user signs into WebOLO and agrees to the terms of service, the terms of service window will now close.
- **[WEBOLO-2188]** - Changed patient's name encryption logic when the customer number is greater than 4 digits.
- **[WEBOLO-2241]** - When showing orders with one pharmacy, the pharmacy column of the orders table on the dashboard is removed. When showing orders with multiple pharmacies, the pharmacy name is shown on the pharmacy column when viewing them on the dashboard.
- **[WEBOLO-2244]** - If there is only 1 pharmacy, the user will directly be sent to place order screen.
- **[WEBOLO-2259]** - Fixed Issue of Availability failing while ordering from a Central Ordering account from different time zones of respective Sites.
