

Release Notes for WEBOLO Version 1.6.5

Product Name: WEBOLO

Release: Version 1.6.5

Release Date: Monday April 13th, 2026

Previous Releases: Version 1.6.4

Key Features:

Software Module	Version	Key Features/Functionalities
WEBOLO	1.6.5	<ul style="list-style-type: none">Added a “Verify Order” option after a submission timeout to confirm whether the order was already submitted before allowing resubmission.The View Order screen now sorts orders by entry/submission date and includes pagination.The end user who places the order will receive email confirmations for all status updates in PharmOLO (e.g., confirmed, shipped, or cancelled).
PharmOLO	1.6.5	<ul style="list-style-type: none">Allow users to create their own holiday or maintenance schedules, which will automatically block those days in the capacity schedule.Users can now filter the schedule by product.

Other Non-Functional Enhancements:

Software Module	Version	Key Features/Functionalities
WEBOLO	1.6.5	<ul style="list-style-type: none">Changed the data type of the submitted flag from bit to tinyint.

Fixes:

Software Module	Version	Key Features/Functionalities
WEBOLO	1.6.5	<ul style="list-style-type: none">Fixed an issue where the order confirmation email included doses that failed to submit.Favorite doses can now be filtered by site.Added a “Show All Pharmacies” button on the Pharmacies page instead of the Order Doses page.Removed email recipients from Preferences for pharmacies with expired contracts.Fixed an issue where the Order Edit button was not working.
PharmOLO		<ul style="list-style-type: none">The schedule can now be filtered by products for which the user has created schedules.When creating or editing a schedule, time slots cannot overlap.
